

LEGO Workshops

LEGO Minecraft Workshop

Explore the amazing world of Minecraft with LEGO®! Using official LEGO® Minecraft® sets, participants will construct a Minecraft Micro World by creating and customizing their own Minecraft village complete with houses and crops. We will also construct the Minecraft Obsidian Portal and The Nether complete with Netherrack, flowing lava, gravel, and bedrock. Note: Participants DO NOT take projects home.

LEGO Robotics & Engineering Workshop

In this action-packed hands-on workshop, participants will use LEGO® Power Functions and LEGO® Mindstorms to construct LEGO® projects. Participants will work from specialized instructions to create a variety of different projects including a racecar, top-spinner, ping-pong ball shooter, and a remote-controlled car, and a battlebot. Opportunity will also be provided for participants to customize their designs! Many new projects are available for returning students. Note: Participants DO NOT take projects home.
